PROFILE

Big Data Engineer with a strong background in data analysis, processing, and large-scale data management. Specialized in tools like Hadoop, Spark, and cloud platforms, I design efficient and scalable solutions that transform vast amounts of data into strategic insights for decision-making. With an analytical and detail-oriented mindset, I am passionate about tackling technological challenges and adding value to innovative projects. I continuously strive to learn and apply best practices in dynamic and collaborative environments.

EMPLOYMENT HISTORY

Big Data Engineer at Syntonize

Oct 2025 — Present

- Develop and maintain data processing workflows to support BBVA's nationwide branch network.
- Build and manage datasets related to powers of attorney and authorizations (valid and expired) from legal entities to individuals.
- Design data pipelines and analytical tables, ensuring data quality and consistency with source systems.
- Create and maintain BI dashboards to provide clear insights for business users across Spain.

Tech Stack: Python, Apache Spark, SQL, AWS, Microstrategy

Big Data Engineer at Bluetab, an IBM Company

Jun 2023 — Oct 2025

- Develop data ingestion processes to make tables available in distributed environments.
- Implement and optimize jobs in Scala and Spark, replicating logic from host systems.
- Plan executions using Bash scripting and manage deployments in Cloudera and Databricks.
- Parallelize data to ensure consistency with host results.
- Monitor production releases, ensuring process stability.

Tech Stack: Python, Scala, Apache Spark, SQL, Bash Scripting, Git, Cloudera, Databricks

EDUCATION

Master's in Big Data and Data Science: Applications in Commerce, Business, and Finance, Complutense University of Madrid

Oct 2021 — Jun 2022

Bachelor's Degree in Economics, Complutense University of Madrid

Sept 2016 — Jun 2021

CERTIFICATIONS

Microsoft Certified: Azure Data Engineer Associate

Sept 2023

Microsoft Certified: Azure Data Scientist Associate

Sept 2023
